Paternal Urinary Concentrations of Parabens and Other Phenols in Relation to Reproductive Outcomes among Couples from a Fertility Clinic

Laura E. Dodge, Paige L. Williams, Michelle A. Williams, Stacey A. Missmer, Thomas L. Toth,
Antonia M. Calafat, and Russ Hauser

Table S1. Distribution of unadjusted and specific gravity (SG)-adjusted paternal urinary phenol concentrations (ng/ml).

Table S2. Associations between fertilization rate among initiated cycles and quartiles of geometric means of specific gravity-adjusted urinary phenol concentrations among men whose female partner underwent in vitro fertilization.

Table S3. Associations between the proportion of high-quality embryos among initiated cycles and quartiles of specific gravity-adjusted geometric mean urinary phenol concentrations among men whose female partner underwent in vitro fertilization.

Table S4. Associations between implantation and quartiles of geometric means of specific gravity-adjusted urinary phenol concentrations among men whose female partner underwent in vitro fertilization.
